

“ upc cablecom provides us with a high-performance, efficient and competitive broadband telephony and Internet network. It is so extensive we can link up our sites throughout the canton. ”

Rémy Pasche, head of the telecom unit, IT systems management, Vaud canton

The Vaud canton public administration has been relying on upc cablecom since 2003 to provide its telephone network and Internet access for 10,000 users at 800 sites. In this huge canton, the extensiveness of upc

cablecom's network is valued highly by Vaud canton's IT systems management telecom unit. It allows it to connect a large number of administration sites throughout the canton using upc cablecom's own net-

work. Featuring redundant connections, it offers high availability at extremely attractive rates as part of a particularly flexible package.

Your ambition. Our commitment.
